

Jeff Fair recently departed the Greater San Antonio Chamber of Commerce as the Vice President of Economic Development. In this role, he is responsible for serving as a leading policy expert, strategist, and resource for important issues surrounding key regional industries including cybersecurity and IT, commercial space and aerospace, healthcare and bioscience, and advanced manufacturing. He is also the Greater Chamber lead for small business support, the startup ecosystem, international trade, and regional economic development.

Before joining the Chamber, Fair worked in intelligence and cybersecurity at Lackland Air Force Base following a 23-year as an US Army officer. During his service, Jeff served at the National Security Agency and United States Cyber Command in strategy and policy roles as well as in operational assignments for the agency. This included a year as a fellow in the agency director's office and time at Cyber Command's Commander's Action Group, a key group providing strategy and analysis for the commander's top priorities.

Prior to arriving at NSA, Fair's Army career included serving as a deputy brigade commander and personal intelligence advisor to the commander of US Forces in Korea. He deployed several times to various locations including Iraq, Afghanistan, and others. He was also an instructor at the National Intelligence University, teaching classes on analysis, strategy, and cybersecurity.

Fair has a B.A. from the Elliott School at George Washington University, an M.B.A. from Hawaii Pacific University, an M.P.A from the University of Washington's Evans School, an M.S. in Strategic Intelligence from the National Intelligence University and is doctoral candidate at the George Washington University's Trachtenberg School of Public Policy and Administration.
