

Wayne Fagan Co-founder The Dee Howard Foundation

As a longtime legal partner to aviation pioneer Dee Howard, Wayne Fagan co-founded The Dee Howard Foundation in 2013, a dynamic nonprofit that champions Pre-K through 12th grade aeronautical STEM education. Under his leadership, the foundation partnered with school districts to integrate hands-on aerospace learning into classrooms. Fagan's commitment to expanding access led him to establish the Dee Howard International Education Foundation, focusing on rural STEM education across multiple states. With over five decades of legal expertise in aviation and internal law, Fagan has also served on numerous advisory boards, fostering cross-border collaboration and innovation. His visionary efforts have inspired countless students and solidified San Antonio's role as a leader in aerospace education an industry. Another do-not-miss luncheon!
